INTRODUCING
NVT47

DESIGNED TO LAST

NVT47 is one of the key features that makes NEXX Essentials™ a forerunner in the performance mobility industry. Its long-life cleanability combined with its capability to prevent germs from living on textiles work together to improve interior mobility applications.

NEXX Essentials allows complete customization for each vehicle, while maintaining safety, functions and comfort that elevate your mobility interior experience.

- Abrasion resistance and ease of cleanability
- Built-in water and oil repellency performance
- Engineering that passes automotive flammability requirements

Sage's NVT47 performance technology combines chemistries to ensure desired testing results for anti-viral efficacy on textiles without sacrificing the durability and comfort attributes that end consumers expect in their mobility interiors.*

DISCLAIMER: *Anti-microbial chemistry is EPA registered. Sage is currently not pursuing anti-viral registration & approval from the U.S. Food & Drug Administration (FDA). Product not registered for any public health use in the U.S.

Sage offers 3 different performance chemistry packages for anti-viral efficacy on textiles:

NVT47-STANDARD

NVT47-PREMIUM

NVT47-NON-METAL
